15. Other relevant information :

2006 – 2008

CHINA

Coordinator of a project aimed at realizing an industrial logistics park in China together with the major Italian freight villages and the support of Italian Public Authorities

2004- 2007

BRAVO

Partner in the EU BRAVO Project whose objective is to develop and demonstrate an action strategy on rail freight and intermodal rail-road services. BRAVO will lay foundations for achieving a significant and sustainable increase in intermodal volume on the Brenner corridor, but it shall also be designed as a blueprint applicable to other pan-European freight corridors.

2005-

ALPFRAIL

Displacement of freight flows to rail in the whole alpine space by innovative concepts. A rail network, which enables connections to all directions, should be generated. The project work of AlpFRail is established for four years and invested with four million Euros.

2005-

MTRADE

Assessing the differentiators of introducing GNS positioning technologies (EGNOS and future GALILEO services) in the multimodal freight transport sector, as technological measure aimed at contributing to the EU policies in the frame of transport sustainable development (as reported in the White Paper).

2004-

GILDANET

Partner in the GILDA project whose objective is to develop new organizational models and prepare technological solutions in order to make the intermodal freight transport more efficient combining road transport with sea transport.

2005 –

LENINGRAND REGION

Coordinator of a feasibility study aimed at realizing a logistics platforms within the Leningrad Region and analysing the socio-economic and territorial situation of the same Region, the traffic flows and the operating infrastructures.

2004 –

KLAIPEDA

Analysis of special conditions and business opportunities for new economic infrastructure and services in relation to the logistics centre. Development of the legal framework on the basis of PPP model

2004-

SESTANTE

Partner in the SESTANTE project whose main objective is to identify and analyse all the informative and documentary flows that play a very important role in the logistic and intermodal chain.

2004 -

SIT

Leader of the Cluster n° 4 inside the SIT network whose objective is to enhance the attractiveness and efficiency of freight intermodality by developing an overall approach on safety and security.

2004 -

TUNISIA&ROMANIA

The projects have the objective to make a feasibility study about the possible realisation of a logistics platform in the two Countries on the basis of the:

- ❖ Analysis of the logistics chain Italy/Tunisia Italy/Romania, and of the companies that have direct connections with Tunisian or Rumanian companies
- ❖ Analysis of the economic situation in Tunisia and Romania
- ❖ Transport Infrastructures and structure
- ❖ Goods flows
- ❖ International transport market

❖ Tunsian and RomanianPorts

1998 -

FV 2000

Project leader of European Commission DGVII sponsored research project "FV-2000" the aim of which is to establish whether the proximity of transport and logistics activities is a key factor for the use of intermodal transport and to define which internal organisation is to be adopted to satisfy environmental and safety requisites and maximise the efficiency of intermodal operations.
